APPLICATION FOR THE HBL TECH TRAINEE PROGRAM

Dear Hiring Team at HBL,

I am writing to apply for the Technology Trainee Program at HBL. As a final-year Computer Science student at Habib University studying on a 100% HUTOPS scholarship, I have spent the last few years building software across the spectrum—from core operating system kernels to generative AI models and web platforms. I would love the opportunity to bring this practical technical foundation to HBL's technology team.

My interest in banking technology grew during my internship at AlBarkah Bank, where I got a clear look into digital banking operations, analyzing mobile architecture and authentication flows while building SQL-based alerting tools to monitor system health. Beyond traditional software engineering, I have focused heavily on AI systems—ranging from building a production-grade multimodal RAG pipeline for agricultural data to co-authoring research that ranked 1st globally at ACL SemEval-2026. These experiences taught me how to tackle complex technical problems with precision and scale.

WHAT I BRING TO THE TEAM:

- **Full-Stack & Systems Engineering:** Hands-on experience creating responsive, data-intensive web apps and structured databases using React, TypeScript, Node.js, and PostgreSQL.
- **Applied AI & Problem Solving:** Experience fine-tuning vision-language models, processing multi-modal data streams, and building practical AI tools that solve real-world problems.
- **Adaptability & Collaboration:** A track record of collaborating across multidisciplinary teams in corporate internships, research labs, and community projects.

HBL has set the standard for digital banking innovation in Pakistan through platforms like HBL Mobile and Konnect. The Tech Trainee Program is an exciting opportunity for me to learn from senior engineers, tackle large-scale challenges, and contribute meaningfully to software that millions of people rely on daily.

Thank you for reviewing my application. I would welcome the chance to discuss how my background and enthusiasm for software engineering align with HBL's goals.

Sincerely,

Marium Zeeshan
BS Computer Science (2026), Habib University
